

Prolonged Field Care Casualty Card v22 (10June2019)

Hour																						H	Treatment Checklist	✓
Minute																						M	Stop Massive Bleeding	
	Other																					Other	Open Airway	
	200																					200	Thoracostomy or Needle D	
	190																					190	Initiate Blood Transfusion	
	180																					180	1st TXA dose (ASAP)	
	170																					170	Calcium	
	160																					160	Send MIST Report	
	150																					150	Reassess Tx	
BP	140																					140	Expose	
	130																					130	Detailed Exam	
	120																					120	Pelvic Binder	
	110																					110	Hypothermia Tx	
Systolic ∇ Diastolic ▲	100																					100	Monitors	
	99																					99	2nd IV/IO	
	98																					98	GCS/Neuro/MACE	
	96																					96	Analgesia	
Temp X	96																					96	Sedation	
	95																					95	NG / OG tube	
	94																					94	Upgrade Airway	
SPO2 ◊	93																					93	Post Cric Checklist	
	92																					92	Vent or BVM w/ PEEP	
	91																					91	Recalc TBSA and Fluids	
Pulse ●	90																					90	Ultrasound EFAST	
	85																					85	Teleconsult	
	80																					80	Pressors for distributive Shock	
	75																					75	Convert TQ <4hrs	
MAP Δ	70																					70	Foley / Bladder Tap	
	65																					65	Adjust Vent Settings	
	60																					60	UA Dipstick	
	55																					55	Clear C-Spine	
ETCO2 ■	50																					50	Position Pad Patient	
	45																					45	Peripheral Pulses	
	40																					40	Compartment Syndrome	
	35																					35	Escharotomy	
Respirations ○	30																					30	Reduce / Splint Fx	
	25																					25	DVT Prophylaxis	
	20																					20	Antibiotic War Wound Tx	
	15																					15	Tetanus	
0	10																					10	Labs	
	5																					5	X-Ray / Imaging	
	No Read																					0	PreOp Eval	
Urine Output																					No Read	Debridement		
Fluid Input																						Amputation		
RASS/ Pain Scale																						Fasciotomy		
AVPU/Neuro/MACE																						Shunt		
Eye response	4																						Preperitoneal Pelvic Packing	
Oral Response	5																						Nursing Care Reminders	✓
Motor Response	6																						Vitals	
GCS Total	15																						Flush Saline Locks	
Drug/Intervention:																						Suction ET Tube		
Drug/Intervention:																						Reposition (30° Each side)		
Drug/Intervention:																						Oral Care / Hygiene		
Drug/Intervention:																						Foley Care		
Drug/Intervention:																						Check Peripheral Pulses		
Ventilator Mode																								
Tidal Volume	Vt																							
Vent Rate	RR																							
Percent O2	FiO2																							
PEEP	PEEP																							
Peak Pressure	PIP																							
Plateau Pressure	pPlat																							
In to Out Ratio	I:E																							
Flow Rate	IFR
